SMOKING CESSATION

There are reasons why a smoker should quit smoking: health reasons - risk of cancer, heart disease, and emphysema; risk to others - like secondhand smoke and smoking during pregnancy; the habit itself - the smell, the expense, and even the color of a smokers' teeth. These are good reasons but it's difficult for a smoker to quit!

If you have crew members who are trying to quit, but are struggling in their efforts to stop smoking, you may wish to offer your assistance by providing them with the below merchandise through the Ships Store:

Nicorette® and NicoDerm CQ®

Nicorette® gum, available in two strengths, works by releasing nicotine through the mouth lining in doses controlled by the person using the product.

NicoDerm CQ® patch, available in three strengths, works by releasing a steady stream of nicotine through the skin.

Both of these products use a step-down approach that allows smokers to start with an appropriate strength and, over the course of several weeks, gradually reduce their nicotine intake.

These items are available using the Simplified Purchase Procedures (Special DD Form 1155), as outlined in the Ships Store Afloat, NAVSUP Publication 487, para. 4202. Ships may also provide ordering information (purchase order number, item stock number, and quantities desired) to NEXCOM, Ships Store Program, via either saltsgam, email, telephone, or fax. The following are provided for your convenience:

The retail price your crew will pay in the Ships Store for these items is significantly lower than if they purchase them on the outside market.

*** Notes:**

1. The elimination of smoking products for sale in ships stores is not authorized nor an option for ships. Congress specifically directed by Public Law title 10, 7604.352 that tobacco products would be offered for sale in ships stores for persons who wished to continue smoking, per NAVSUP P-487, para. 3005.
2. Pricing of tobacco products must be in accordance with NEXCOM Ships Store Bulletins on Cigarette Pricing Policy. CNO in NAVOP 026/92 of October 1992 directed that ships would follow NEXCOM Navy Exchange pricing directives.
